### PROGRAMMING HAND KEYPAD

#### DE/17446 Programming hand keypad

To programm the different adjusments of the universal electronic cards.

For example : Voltage (12-96V),...

### TRANSFORMATIONKIT

The "KT-2" assembly kit is an accessory allowing to replace the electronics of any battery charger. Generally it is employed to substitute electro-mechanical systems or to replace out-of-order cards or cards which cannot be repaired or found. The power assembly made up of transformer, diode bridge and contactor is taken to be still efficient.

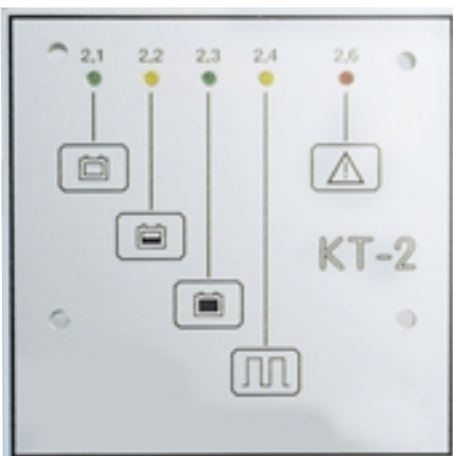

#### Component List
